## SEVERAL CHANGES ARE LIKELY

Increasingly worried about their League position, the Town have been in negotiation this week for a scoring forward, and although nothing definite had been achieved in this direction vesterday, team selection has been deferred.

In view of thiseit would seem that there are some hopes that there will be a new signing in time for the home match with Leicester City on Saturday, but whether this happens or not, there are likely to be

Shanks And Watkins

In The Attack?

HINT of the pattern of things was given yesterday by the manager when he told me that he was considering Wally Shanks and Charlie Watkins, who have been the regular wing halves for the greater part of this season, for places in the forward line. Shanks, of course, came as a torward and has sampled every position in the front line since half and move Sid Owen back to his old berth on the left flank. This would not point to any dissatisfaction with Owen's form As for Watkins, he has shown, in the past, an aptitude for scoring goals when he has been moved up to inside forward, and he scored three times on his five appearances in the front line

On their visit to Welling-borough, Old Lutonians brought off a creditable win over a strong Old Grammatians' XV.

The secret of success lay in the unprecedented at rength and mobility of the Old Lutonians' pack, which dominated the game for long periods.

Thorpe opened the scoring after a perfect pass by Edmonds, and Wood was on the spot to tooch down after a defensive error. A third try engineered by the forwards was soared by Adkins after a brillians dribble by Shepherd. Further pressure forward led to a five-yard scrum from which Grimshaw went over.

The home team meanwhile had scored and converted a try and after the chance-over they made a powerful come-back. The only second-half score, however, was when Conners picked up a loose ball with the full-back out of position and ran half the length of the field to score between the posts.
